Praxyk: Sprint 2 Report
2015/11/16

Actions to stop doing:
- Stop breaking the build!
- not writing unit test

Actions to start doing:
- Better git hygiene
- Code needs to be better documented
- Develop testing framework/test driven development

Actions to keep doing:
- Good coordination
- Current code styles
- Implementing more good models

Work completed:
- Facial recognition
- payment integration
- Spam detection
- Master control system
- Website Update
- Devops Fixes
-

Work not completed:
- Client script
- Python Client Bindings
- The billing function
- Chatter Server
- Spam refinement
- Research speech->string

Work completion rate:
- 12/16 user stories completed
- 14 days from release presentation to end of sprint
- 10-11 ideal work hours per week (2-3/day) initially planned
  - Actual range was estimated to be 6-10 per week in the end, with some work starting in the evening and going late into the night (going off of Git commits).
- 21 work hours initially predicted for sprint
  - Not all work was completed, and similar to the first sprint, we spent much more time on some tasks than was estimated during the planning meeting, so the time ended up being greater.
